

R1200 Aqua Cleaner

GUN CLEANER FOR WATER BASED PAINTS

Based on the R1000, the R1200 works on the same tried and trusted principles, but has the added features, of a splash canopy ensuring that the surrounding area stays cleaner, a mixing paddle which makes the flocculating process more efficient, an air gun to dry the internal and external surfaces, and a clean rinse nozzle for final cleaning.

The R1200 has been designed to ergonomically match the R9000 series machines and the new RWM-90 waste management units increasing the functionality and improving the look of the mixing room.

FEATURES:

- Manual cleaning
- Quick cleaning of paint ducts
- Spray out and drying
- Efficient water recovery
- Drester pump
- ATEX approved
- Pumped evacuation of water to drain

TECHNICAL DATA:

Liquid volume of wash basin:	35 litres
Air supply:	6-12 bar (95-180 psi)
Air consumption:	150 l/min
Flow through brush:	1.5-2 litres/min
Pump capacity:	7 litres/min
Dimensions:	780mm (W), 1470mm (H), 570mm (D)
Weight:	65 kg (150lb)
