POL0020

Environmental Policy – RoHS Compliance

The aim of Redashe is to minimise the environmental impact of waste electrical / electronic equipment by limiting the quantities of certain hazardous substances which products may contain as outlined in the WEEE regulations.

Although RoHS (Restriction of Hazardous Substances) regulations are primarily a directive for electrical equipment manufacturers, as part of the Redashe commitment to minimising the impact of its activities on the environment, Redashe recognise the importance of only importing and distributing, RoHS compliant product.

As a consequence, all electrical / electronic equipment supplied by Redashe through its extensive distribution network will comply with the RoHS directive.
