

N4000NX-1

Nexion - Antistatic Gun

The Nexion is an air operated electrostatic removal device used to reduce static across many industries, but in particular, paint refinish. Operating via its own energy generation, no batteries or charging is required giving you the peace of mind that the Nexion will work every time, all the time.

Adjustable air volume valves allow you to set the Nexion specifically for your paint booths pressure, ensuring that your working with its maximum efficiency without trigger or airline manipulation.

An indicator light is found on the lefthand side showing the guns operation, overpressure, and underpressure conditions.

TECHNICAL DATA

Ion Generating Mode:	AC 10khz
Decay Time:	0.2 sec (+, - 1,000v -> 100v)
Ion Balance:	Less than +/- 10v
Air Pressure:	3 - 6 bar
Air Injection Volume:	80 - 120 L/m
Air Injection Angle:	25 Degrees
Distance:	10cm - 50cm
Life Time:	5000 - 10000 Hrs
Weight:	230g
