

K4 Super-Lube Manual Grease Pump

The K4 Super-lube is a manual greasing system designed to fit grease pails from 12.5kg (28lb) to 22kg (48lb) and includes a unique KR grease gun that delivers grease at either high volume or high pressure up to 69,000kPa/10,000 PSI/690 bar. When on the high pressure setting blocked grease nipples can be easily cleared.

The fully sealed system ensures that your grease is kept free from contamination that destroys bearings and causes expensive down time. The rubber edged follower wipes the grease off the wall of your grease container.

To operate the K4 Super-Lube press the plunger. This will prime the pump and provide you with 60 shots of grease through the KR grease gun.

The K4 Super-Lube is a very economical way of achieving a bulk greasing system which can be made portable with the optional TR5 drum trolley.

FEATURES:

- Delivers approx. 1.25gms on high volume switch
- Delivers approx. 0.45gms on high pressure switch
- Suitable for use with greases up to NLGI No. 2
- Optional trolley - TR5, provides portability

* Note: Custom-made models available for non-UK spec grease pails.
UK standard size is 12.5kg
