

ZWM2000 Digital DEF Turbine Flow Meter

Digital turbine meter with Polypropylene construction, designed especially for use with DEF (Diesel Exhaust Fluid), water etc.

FEATURES:

- Polyamide turbine measuring mechanism
- Electronic display using one 3v CR2450 battery
- Polypropylene body and sealed electronic card making it suitable for use in severe weather conditions (IP55)
- Display can be rotated in 4 different positions
- Bi-Directional – Either ports can be used as inlet / outlet
- Measures in litres, quarts, pints and gallons
- Easy user re-calibration
- Ports: 1"bsp female
- Recommended use: Urea, AdBlue, DEF, windshield fluids, water and water based media
- Not suitable for fuels and oil
- Wetted components: polypropylene, polyamide and stainless steel

TECHNICAL DATA

Flow Rate:	4-120lpm / 1-30gpm
Accuracy:	+ / -1%
Repeatability:	+/-0.25%
Max. working pressure:	150psi / 10bar
Water resistance:	IP55
Working temp. range:	-20°C - 70°C
Max. resettable batch total:	99,99,999
Max non-resettable total:	99,99,999
Least count/resolution:	0.001 units
